eLearning at Lorain County Community College (LCCC) supports the delivery of high-quality instruction through technology. We provide faculty, students, and staff with the tools, expertise, and support needed to enhance teaching and learning across all course modalities. Our team assists in designing, developing, and delivering engaging educational experiences using Canvas and other instructional technologies.

LCCC eLearning courses integrate technology to create flexible, interactive learning environments. No matter the course modality, our team ensures that students and instructors can engage in meaningful, regular interactions through Canvas, video conferencing, streaming media, and other digital tools.
